

## Welcome to the Game On Project

.We can create highly engaging and motivating materials using Game Based Learning to develop basic, personal and work sustainability skills in prisoners, those at risk of offending and ex-offenders, including those with disabilities.

The personal development module will support learning that will develop the employability of the beneficiaries (e.g., managing aggression, responses to problems and stress, self esteem, and trust). The work sustainability module will support the expectations and code of conduct of employers, the legal and safety issues of employment etc. There will also be Basic Skills modules dealing with entry level numeracy and literacy.

These materials are be designed and developed by 7 partners throughout Europe (UK, Italy, Bulgaria, Greece and Romania) to take full account of cultural and language variations. These flexible games based learning tools will then be trialled and released to improve prison based education throughout Europe

This project has been funded with support from the European Commission. This website reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.
